

## Tony McManus

Position - Consultant, Structural Engineering and Materials

Qualifications - BEng(Hons) Civil Engineering with Architecture 2003, University of Glasgow. MSc

Integrated Building Design 2004, University of Strathclyde.

Professional Association - Chartered Engineer– MICE

Institute of Concrete Technology

Tony is a chartered engineer with almost 10 years industry experience. A wide ranging set of projects and sector experience includes leading the structural teams on some of the most high profile UK arts and culture projects in recent years.

His strong technical background complements high commercial awareness and an ambition to influence the visual, as well as pure engineering goals of projects. Tony is able to offer expert advice on all aspects surrounding the design and procurement of buildings using concrete and cementitious materials in particular. This also extends to condition surveys and durability studies for existing buildings facades and refurbishment projects.

His client base includes Architects, Developers and Sub-Contractors, who he has built relationships with on repeat projects over the last 10 years.
