

Philip Bogan

Position - Associate, Façade Designer

Qualification - BSc (Hons) Architecture (Bartlett School of Architecture)

Phil is a senior designer and project manager, with over 15 years experience in the building industry. Phil has worked on a number of challenging projects, in various industry sectors.

He specialises in the detailed design and delivery of projects that employ geometrically challenging forms, to define their architecture and is very experienced in the use of 3 dimensional CAD design tools, including Microstation and Rhino.

Phil comes from an Architectural background, where he has developed a wide range of communication skills, to explore solutions to cladding problems.
