

## Manuel Dos Anjos

Position - Graduate Façade Engineer

Qualification - MSc in Building and Architectural Engineering, Politecnico di Milano (Italy). BEng in Civil Engineering, Universidad Rafael Urdaneta (Venezuela).

Manuel is a recent graduate with a civil and building engineering background. Having done a building engineering Master program, he is able to analyse façades from different perspectives, as well as performing and reviewing thermal and structural calculations. He brings a variety of skillsets to the table that range from structural analysis, like expertise on structural and glass, modelling and calculation; thermal performance of façades; internal comfort parameters, such as knowledge on sustainability certifications and daylight analyses.

Key FMDC project involvement,  
*Portland House, London (Office—Gensler)*  
*East Oxford Street, London (Office—AHMM)*

Selected key previous projects prior to FMDC employment:

*Mille Arbres, Paris*
